Education

Kongu Engineering College, Perundurai, Erode
B.Tech in Artificial Intelligence and Machine Learning
CGPA - 7.64/10 (2022–2026)

Bharani Park Matric Hr Sec School
HSC - 64.5 % 2022
SSLC - 68 % 2020

Technical Skills

Programming Languages

C, Java, Python, JavaScript

Web Technologies

HTML5, CSS3

Back-End & Server-Side

Node.js, Express.js, RESTful APIs

Databases

MongoDB, MySQL

Version Control & Tools

Git, VS Code, Neovim, Zed

Operating Systems

Linux, Windows

Soft Skills

- Problem Solving
- Adaptability
- Teamwork
- Time Management

Areas of Interest

- Full Stack Development
- Machine Learning
- DataBase Management Systems

Certifications

- NPTEL - Privacy and Security in Online Social Media
- MongoDB Node.js Developer Path
- MongoDB Associate Developer
- Azure AI Engineer Associate

Achievements

- Awarded **Centillion - Feather of the Cap** for commitment in work during the internship in Centillion Labs
- **1st Place** – Hacknovate'24 (24-hour hackathon)
- **1st Place** – Hybrid Code Streak (Solo coding contest)
- **2nd Place** – KEC Hackathon 2k24 (30-hour hackathon)
- Top 100 – SIH Internal Hackathon 2024

Experience

Centillion Labs — Intern
Feb 2024 – Apr 2024 Remote

- Experienced in deploying applications and managing scalable, secure cloud environments using platforms like AWS and GCP
- Proficient in using Terraform to automate infrastructure provisioning with reusable, modular IaC configurations.

Shine Logics — Full Stack Developer Intern
Jun 2024 – Dec 2024 Remote

- Integrated AI-driven features into full-stack applications to enhance user experience and automation.
- Leveraged advanced AI tools to optimize application performance, accuracy, and functionality.

Projects

Multiple Disease Prediction [🔗 Link](#)

- Developed ML model using Random Forest, GaussianNB, KNN, and SVC for disease prediction.
- Implemented data visualization and evaluation metrics (accuracy, precision, recall, F1-score) to analyze model performance and compare algorithm effectiveness.

Wildfire Detection — CNN [🔗 Link](#)

- Designed and trained a CNN using TensorFlow to detect fire in images, using data augmentation and preprocessing to improve model accuracy.
- Evaluated model performance using metrics like accuracy and loss curves, and fine-tuned hyperparameters for optimal results.

BookXplorer — React App [🔗 Link](#)

- Developed a book search app using React and Google Books API, enabling dynamic search and real-time results.
- Implemented features like live search, pagination, and error handling to enhance the user experience.

Hardware-Enabled Root of Trust - Cyber Security [🔗 Link](#)

- Designed a three-phase authentication system with fingerprint, hardware key signing, and facial validation.
- Integrated TPM and Secure Enclave for secure key management and offline authentication.
- Enhanced system security by ensuring device and user identity verification.

E-Commerce Website - React App [🔗 Link](#)

- Developed a customer-facing module to view products, place orders, and manage the shopping cart.
- Created an admin panel for managing products in the database, including adding and updating product details.
